About MOSONiE-SEF

MOSONiE SEF is a Non-Profit Organisation established in 2015, led by a group of young and passionate women committed to work for the marginalised and underserved community in Northeast India. The name MOSONiE is derived from a Mao tribal word from the state of Manipur meaning commonwealth implying “**less of me, more of us**”. MOSONiE SEF is based at Umtrynga Village, Umling Block Ri-Bhoi, Meghalaya. MOSONiE SEF represents a small yet meaningful contribution to the world’s collective responsibility fostering an environment where people come together to create, restore, and rejuvenate the resources around us. The organisation was officially incorporated on 8th September 2016, under Section 8 of the Companies Act, 2013. Established for the purpose of Peoples Corporate/Shared development and commonwealth, MOSONiE functions without regard to race, gender, nationality and political or religious affiliation. MOSONiE believes in the potential of each individual to reflect the image of God, dignity that is inherent in every person, the importance of the quality of human life and reviving the best in the natural world for the beneficial coexistence of all creatures.

Vision: Regeneration of common wealth towards wellbeing of people and the planet.

Purpose: Empower underserved communities through collective action towards equitable access and resource regeneration.

Core Values: Integrity, Dignity and Inclusivity.

Guiding principle: Transparency, Solidarity, Team work.

Letter from the Executive Director

Dear Friends and Supporters,

As I look back on the past year, I am overcome with a deep sense of gratitude, pride, and renewed purpose. The journey of the MOSONiE Socio-Economic Foundation throughout 2024–2025 has been nothing short of transformative. In a year marked by both opportunities and challenges, our commitment to empowering underserved communities remained our guiding light. We stayed true to our mission of promoting equitable access and regenerating local resources driven by the belief that lasting change begins at the grassroots. One of the most defining moments of this year was our first-ever organizational retreat. This gathering provided space for reflection, connection, and collective dreaming. It was more than just a pause, it was a turning point. Together, we revisited our core values, rearticulated our vision and mission, and co-created a comprehensive five-year strategic plan. This process helped us align more deeply with the realities on the ground and the aspirations of the communities we serve.

This renewed clarity and shared vision laid the foundation for the expansion and deepening of our work. We launched new and responsive initiatives aimed at sustainable livelihood promotion and improving women's health and well-being areas that emerged as urgent priorities through community consultations. These programs have already begun making a meaningful difference, especially for the most marginalized families, women, and youth in our focus areas.

We also invested in strengthening our internal systems, building our team's capacity, and fostering a culture of learning and collaboration. These investments are helping us become not just more effective, but more intentional in how we grow.

None of these milestones would have been possible without the trust, solidarity, and partnership of our donors, collaborators, and the resilient communities we are privileged to work with. To our dedicated staff, our visionary board, our field partners, and every individual and institution that has stood by us, you are the heart of this journey. Your support, encouragement, and belief in our mission continue to fuel our progress. As we move forward into the year 2025–2026, we do so with humility, hope, and determination. The road ahead calls for deeper partnerships, innovative solutions, and a steadfast commitment to inclusion and sustainability. We invite you to walk alongside us in this journey-towards a future where every individual, regardless of their circumstances, has the opportunity to live with dignity and purpose.

**With heartfelt gratitude and hope,
Liinai Margaret
Executive Director**

MOSONiE Impact Metrics

Building Sustainable Energy Eco System through Clean Energy Solutions

A total of **534** livelihood-based decentralized renewable energy (DRE) solutions have been installed.

A total of **146** lighting systems have been deployed to support livelihoods, including in shops, parlors, farms, and other establishments.

Soh Marit(Black pepper for Sustainable Livelihood)

A total of **1,300** black pepper saplings have been planted.

A total of **420** banana saplings have been planted.

50 farmers have received support across **5** villages on capacity Building Training and Input supplies(Black pepper and Banana).

720 Kilos of organic manure distributed to **41** farmers in the last financial year.

Livelihood Enhancement through Piggery

A total of **119** farmers have been trained in the principles of scientific pig rearing.

104 farmers have adopted pig farming as a source of livelihood.

A total of **₹4.98** lakh has been disbursed as a revolving fund across nine Village organizations.

A total of **95** farmers have been connected to piggery insurance.

A total of **16** community volunteers have been trained as community vaccinator.

Menstrual Hygiene Management

29 villages have been covered.

A total of 36 awareness sessions have been conducted.

A total of 2,000 menstrual hygiene kits have been distributed to women and adolescent girls.

Cloth for Work & School to School Program

A total of 39 villages have been covered 800 Cloth for Work (CFW) kits have been distributed.

A total of 800 Cloth for Work (CFW) kits have been distributed.

A total of 985 School to School (S2S) kits have been distributed.

14 schools have been supported.

Health Energy intervention in Ri-Bhoi

A total of 47 health centers were monitored across four blocks in the Ri-Bhoi District.

PROJECT AT A GLANCE: FY 2024-2025

BUILDING SUSTAINABLE ENERGY ECO SYSTEM THROUGH CLEAN ENERGY SOLUTIONS

Access to reliable electricity remains one of the most pressing challenges in Meghalaya's rural landscape, particularly in the Ri-Bhoi District. For communities here, especially during the relentless monsoon months, irregular power supply has long disrupted daily life, livelihoods, and aspirations.

In 2017, MOSONI Socio-Economic Foundation (MSEF) took a decisive step to change that. Beginning in Umling Block, MSEF launched its Decentralized Renewable Energy (DRE) initiative, bringing the promise of clean, consistent power to the grassroots. What began with awareness campaigns soon evolved into a comprehensive model that blended energy access with livelihood empowerment.

Through strategic interventions, MSEF:

- Built community capacity in eri silk spinning with solar-powered machines,
- Supported petty shops, eateries, and beauty parlours with lighting for extended business hours,
- Introduced integrated lighting systems and pressure pumps for farms and piggery units,
- Powered agro-processing units and Farmer Producer Organisations (FPOs),
- Linked communities with financial institutions to make these technologies affordable and scalable.

Till date, over **534 clean energy livelihood solutions** has been installed; **388** Livelihood solutions and **146 solar** home lighting in the region. These systems have not only brought light into homes and workplaces but have sparked a larger movement toward economic independence and climate resilience across the region.

For the people of Ri-Bhoi, power is no longer a privilege, it's a pathway to dignity, stability, and hope.

SOH MARIT (BLACK PEPPER FOR SUSTAINABLE LIVELIHOOD)

In 2022, MOSONiE set out to revive homestead gardens in Umling Block, Ri-Bhoi, by promoting Areca nut-based intercropping with black pepper and banana, crops well-suited to the region's climate but underutilized by local farmers.

To bridge knowledge gaps, MOSONiE provided capacity-building training and exposure visits, enabling farmers to realize the high value of these crops.

The initiative reached **50 farmers in 5 villages**, distributing **1,300 black pepper saplings** and **420 banana saplings**, along with **720 kgs of organic manure** combining short-term gains and long-term income security turning homesteads into hubs of sustainable livelihood.

ENHANCE INCOME AND IMPROVE MENSTRUAL HYGIENE IN 10 TRIBAL VILLAGES

Under the thematic area, promotion of sustainable livelihood, MOSONiE Socio-Economic Foundation (MOSONiE-SEF), implemented a three-year program (2023-2026) aimed at enhancing income and improving menstrual hygiene in **10 tribal villages** under Umling Block of Ri-Bhoi District, Meghalaya. The program targeted **1,100 households** and achieved significant milestones in the financial year.

Livelihood Enhancement

1. Livelihood Enhancement Capacity Building Training: **119 farmers** received training on scientific pig rearing, with **104 adopting piggery** as a source of income and livelihood. The training was provided by MOSONiE SEF in collaboration with the office of the Assistant Director, Vocational Training Centre, Kyrdemkulai, Animal Husbandry and Veterinary Department, Government of Meghalaya.
2. Revolving Fund: A total of **₹4,98,000/-** was disbursed to **9 Village Organizations (VOs)** in 3 batches, for 104 trained farmers with each members receiving a loan amount of ₹ 4500/- each. The fund was used to purchase piglets, promoting sustainable livelihoods.
3. Exposure Visits: Farmers participated in exposure visits to resource institutes, enhancing their knowledge and skills.
4. Veterinary Support: Program participants were linked with the veterinary department for medications and vaccinations, ensuring the health and well-being of their livestock.
5. Community Volunteers: **16 community volunteers** were trained on administering medicines, vaccines, and ear tagging for insurance, empowering them to support their communities.
6. Piggery insurance: **96 farmers** were provided with insurance linkage, serving as a safety net in times of livestock losses.

Improving menstrual hygiene in 10 tribal villages

Menstrual health remains a critical yet neglected issue in many tribal communities of Ri-Bhoi District. Economic hardship forces women, often in households with three or more females, to rely on unsafe alternatives like old cloths fastened with safety pins, increasing the risk of infections and injuries. Cultural taboos and lack of awareness continue to deepen the silence and stigma around menstruation.

Recognizing this, MOSONIe has made Menstrual Health and Hygiene a core focus area, aiming to ensure awareness, access, and dignity for women and adolescent girls.

Key Achievements in 2024–25:

- **36 awareness sessions** conducted across **29 villages**, addressing menstrual stigma and promoting safe hygiene practices.
- **2,000 menstrual hygiene kits** distributed to women and adolescent girls, improving access to safe and sustainable hygiene solutions.
- 6 Inhouse Trained in MHM -

Through these efforts, MOSONIe is helping communities move toward a future where menstruation is treated with knowledge, care, and dignity not shame.

HEALTH ENERGY INTERVENTION IN RI-BHOI

Since 2022, MOSONiE Socio-Economic Foundation has been conducting comprehensive physical solar monitoring across **49 health centers in 4 blocks of Ri-Bhoi District**, Meghalaya. The initiative aims to assess and document performance gaps in solar energy systems installed at these centers, ensuring reliable power for essential healthcare services.

As part of this ongoing effort, MOSONiE-SEF, in partnership with SELCO Foundation, conducted **Community Sensitization and Asset Ownership Meetings** at Mawlyndep HWC in Umsning Block and Mawdem CHC in Jirang Block.

The meetings aimed to introduce communities to the solar systems installed in their health centers, promote awareness about the importance of uninterrupted solar power for healthcare, and encourage local ownership for long-term sustainability. Participants included village heads, school teachers, healthcare workers, and residents and expressed interest in supporting the upkeep of the solar infrastructure.

Key Action Points Moving Forward:

- Strengthen security measures to safeguard solar assets
- Train local technicians for routine system maintenance
- Establish a structured community contribution model for sustainable upkeep

This initiative marks a crucial shift toward community-led maintenance and energy ownership, ensuring that health centers remain powered, resilient, and responsive to local needs.

STRENGTHENING COMMUNITIES THROUGH CLOTH FOR WORK AND SCHOOL TO SCHOOL PROGRAMS

Continuing its collaboration with Goonj, MOSONiE-SEF carried forward the Cloth for Work (CFW) and School to School (S2S) initiatives. These programs empowered communities and supported school children in under-resourced areas of Umling, Jirang, and Bhoirymbong Blocks in Ri-Bhoi District, Meghalaya.

Under Cloth for Work, **800 CFW** kits were distributed across **39 villages**, recognizing and encouraging voluntary community efforts in local development.

Through the School to School initiative, **985 essential kits** were distributed to students across **14 schools** helping bridge the gap in basic educational resources for children in need.

ORGANISATION DEVELOPMENT PROGRAM

In 2024–2025, MOSONiE-SEF actively participated in the NoDE (Northeast Organizational Development for Empowerment) Program, aimed at strengthening civil society organizations across the region. Through this, the team underwent several key capacity-building trainings:

i) Strategic Planning with Bridgespan:

Developed a comprehensive five-year strategic plan to guide the organization's growth and impact.

ii) Impactful Communication (NoDE Series):

Joined an online session led by Mr. Souparno Chatterjee, focusing on effective digital communication, storytelling, social media engagement, and donor outreach to enhance visibility and sustainability.

iii) Proposal Writing Workshop – Guwahati

Attended a two-day workshop facilitated by Mr. Shivaji N. Choudhury, aimed at improving skills in project design, budgeting, and proposal writing to meet donor expectations.

These efforts reflect MOSONiE's commitment to continuous learning, stronger systems, and long-term organizational sustainability.

REVISITING MOSONiE VISION & MISSION

From August 12–14, 2024, MOSONiE Socio-Economic Foundation (SEF) conducted a three-day strategic planning workshop on ViMiVASTRA, facilitated by the Roots to Branches team. After nine years of growth, the workshop marked a pivotal moment for MOSONiE as the team revisited its vision, mission, and values with renewed clarity and purpose.

Day 1 introduced strategic tools such as Participatory Rural Appraisal (PRA), Key Informant Interviews (KII), and the River of Life, followed by a participatory SWOT analysis with community representatives from four villages.

Day 2 focused on refining MOSONiE's vision, mission, and core values. With active participation from Board Members, the team aligned its foundational principles with its evolving goals.

Day 3 concluded with the application of the Conscious Full Spectrum Response (CFSR) Model, helping prioritize key issues and shape a strategic action plan for the next three years.

The workshop was a transformative step toward strengthening strategic direction, community alignment, and ensuring sustainable impact for the years ahead.

MSEF ANNUAL RETREAT 2025: Reflection, Recreation & Visioning

On January 17–18, 2025, MOSONiE-SEF held its first-ever Annual Retreat at Chanako Eco Camp Resort, Guwahati, under the theme “Reflection, Recreation, and Visioning.” The two-day event brought the team together for deep introspection, creative learning, and collective goal-setting.

Day 1 began with reflective group discussions, where team members explored key questions around personal growth and organizational experiences. A strategic planning and team-building activity followed, themed around food delivery to communities. The team also revisited MOSONiE’s journey—its key milestones, partnerships, achievements, and challenges—culminating in the creation of a collaborative “Achievement Quilt.” The day concluded with an interactive “Traffic Game” to enhance coordination and engagement.

Day 2 opened with early morning recreation and a lively treasure hunt. Sessions focused on redefining the vision statement around the concepts of Regeneration, Common Wealth, and Well-being. A creative “Who Am I” activity allowed members to reflect on their personal balance across social, physical, and emotional dimensions.

The day also included a leadership-themed video featuring Cristiano Ronaldo’s team, a music video on active listening, and multiple games promoting teamwork, collaboration, and problem-solving. Members later contributed responses to two guiding questions:

1. How can I contribute to MOSONiE?
2. What skills are needed to achieve our vision?

Through shared reflections, gratitude letter writing, and collaborative exercises, the retreat fostered a renewed sense of purpose, unity, and commitment—marking a powerful step toward building a resilient and values-driven team.

Vishakha Journey towards Menstrual Health

Vishakha Shadap, 39 years old, a dedicated teacher at Umtyrnga Presbyterian School with over 20 years of teaching experience, She is one of the school's most seasoned educators. She's been actively involved in various programs and activities, but one initiative inspired her, i.e. the awareness and introduction of reusable sanitary pads by MOSONiE SEF & Project BAALA. Previously, She used cotton cloth, but leakage issues led her to opt for disposable pads, despite feeling guilty about the environmental impact. Now, she's thrilled to receive BAALA reusable sanitary pads, praising their softness and ease of washing. Confident in their effectiveness, she is eager to share her experience with students and friends, promoting sustainable menstrual hygiene practices. Her enthusiasm embodies the positive change reusable sanitary pads can bring, empowering women and supporting a healthier environment.

Neina's journey towards pig rearing

Neina Sangma, aged 34, is from Mawiong village, Umling Block, Ri-Bhoi District, Meghalaya. She lives with her family of four members. A housewife, her husband works as a driver on the Guwahati–Shillong route. Neina shared that she had never reared pigs before receiving training from MOSONiE SEF. It was only after attending the training that she started pig rearing. She proudly mentioned that her pig grew to be the biggest among her batch. She learned about the training when MOSONiE SEF visited their village to introduce the project, and also through her Self-Help Group (SHG) members. Since she had no prior experience, her knowledge of pig rearing was limited to the basics. During the training, she learned about different pig breeds and the appropriate feed required to ensure the pigs grow healthy and fast. She received Rs. 4,500 to purchase a piglet, which she reared for nine months and later sold for Rs. 18,000. With the earnings, she repaid her loan, covered some household expenses, and bought a new piglet. She also mentioned that she received timely veterinary and MOSONiE SEF support, whenever a pig fell ill, she could call, and the vet would come and provide treatment. Neina is planning to continue pig rearing as it provides her with financial support whenever needed. She said she has not faced any major challenges so far, but she hopes to receive assistance in building a proper pigsty. She expressed her gratitude to MOSONiE SEF for providing this opportunity and supporting her journey in pig rearing.

Empowering Farmers: Mr. Beldish Journey to Sustainable Livelihood through Black Pepper and Banana Cultivation

Mr. Beldish Sangma, 46 -year-old farmer, has been struggling to make a living by engaging in daily wage labour and cultivating other cash crops such as brinjal, bitter gourd, pumpkin, bottle gourd, betel nut and betel leaves. His income was inconsistent, and he faced difficulties in sustaining his family, especially during off-seasons. In 2022, Project Soh Marit (Black pepper for sustainable Livelihood) was introduced to him. This intervention was aimed at diversifying crops to increase farmers' income through climate-resilient and high-value crops (plantation of Black pepper and Banana). Mr. Beldish received training on Black Pepper plantation techniques, including site selection, planting, irrigation, mulching, Vermi Compost Making and pest management. Within one year, Mr. Beldish banana plants have started bearing fruits; he now earns an income by selling bananas and has improved her family's living conditions. He also has a plan to increase his plantation in banana and black pepper.

Linda Jourey towards eri silk

Before MOSONiE's intervention, Linda, like many other women in her community, would sell raw cocoons for ₹700 per kg. Spinning the yarn manually with a traditional tool called a 'Takli' took around one and a half months to produce 1 kg of yarn, limiting the income potential for women engaged in this activities. After the introduction of the solar-powered eri spinning machine, the productivity of women like Linda drastically increased. She could now spin 5-6 kg of yarn per month, raising the income from ₹2,500 to ₹10,000 monthly. This intervention not only made spinning more efficient but also significantly improved the economic well-being of her family and reduce the drudgery. Linda embraced her new role as an eri silk spinner and soon became a master trainer in her area. She has trained over 100 women, sharing her knowledge and empowering others to increase their incomes and improve their livelihoods through eri silk spinning. Through MOSONiE's support, Linda's journey transformed her from a daily wage laborer into a skilled entrepreneur and trainer, uplifting her community in the process.
