LETTER FROM THE EXECUTIVE DIRECTOR

NETAJI BASUMATARY
Executive Director

Dear Friends and Well-Wishers,

As we celebrate a significant milestone 25 years of relentless commitment and transformative change, with immense joy and gratitude that we present the Annual Report of the ant for the year 2024–25.

What began as a humble initiative in the Bongaigaon district (now Chirang) in 2000 has grown into a trusted organization for empowerment and development across Northeast India. Through years of working in conflict-affected and remote rural areas, we have stayed rooted in the founding vision while adapting to meet the changing needs of the communities we serve. This journey has been driven by the unwavering dedication of our team, the strength of our partners, and the resilience of the people we work with.

Over the past 25 years, our work has expanded to address the complex challenges faced by marginalized communities. We have nurtured initiatives such as Aagor Dagra Afad, a self-sustaining handloom enterprise led by women where many of whom were once domestic workers or among the most vulnerable in society. In 2007, we launched Project MITA (Mental Health Treatment Alliance), which now provides mental health support through partner NGOs across more than 14 districts, reaching over 5,500 individuals annually. That same year, we established the Institute of Development Action (IDeA), which has trained over 1,000 NGO professionals and continues to strengthen civil society as an independent support organisation.

In 2014, the youth associated with the ant founded Sifung Harimu Afad, a cultural collective that celebrates Bodo music and dance while empowering young people, especially girls to break societal norms by playing traditional musical instruments. These efforts reflect our long-standing commitment to cultural preservation and gender inclusion.

Currently, our work is centred around five interconnected themes: promoting gender equity, fostering sustainable livelihoods and addressing climate change, improving health outcomes including nutrition, anaemia, SRHR, and mental well-being, ensuring access to quality primary education, and building life skills for youth empowerment.

This Annual Report highlights the achievements, milestones, and inspiring stories from the past year. It stands as both a celebration of all we have accomplished together and a reminder of the continued work ahead. We are deeply grateful to our founders, past and present team members, community leaders, grassroots partners, and our generous supporters. Your faith in our mission has been the foundation of this 25-year journey. As you read through the pages of this report, we invite you to celebrate with us, reflect on the shared progress we have made, and renew your commitment to the path ahead. Together, let us make the next 25 years even more impactful and transformative.

Netaji Basumatary
Executive Director, the ant

Highlights of the year

• Sustainable Livelihoods

Enhance the livelihood of small farmers through diversification of sources of income.

- 50 villages, 2400 farmers (1200 Susfarms, 200 ITDPS, DWIMU & BARDWI 1000)
- Intercropping with sericulture plants in 79 hectares of land (DWIMU & BARDWI)
- 15 acres of homestead garden (calculated as 1 katha x 522 farmers from susfarm)
- 180 acres (1 acre per farmer) orchard - Mango, Apple Ber, Assam Lemon and Neem (ITDPs)

• Mental Illness Treatment Alliance

-The percentage of following up clients is 30%. i.e . out of 5815 registered clients, 1745 are continuing

-No. of camps conducted in PHCs (April 2024-March 2025) = 60, 1 camp each PHC once a month.

-A total of 359 patients received psychoeducation from the month of November to February 2025.

OUR SDG GOALS

AVAHAN 3.0

As the ant celebrates its 25th anniversary, it reflects on its journey since 2017, when it launched AVAHAN (Against Violence at Home – Act Now), a deep-rooted commitment to combat domestic violence. Over the years, AVAHAN has blossomed into a movement, empowering survivors with comprehensive support services and fostering community support groups that stand against violence in all its forms. Now, with AVAHAN 3.0, the ant continues its mission, building on the progress made and further strengthening its impact in the lives of those it serves.

2024

Started working in 53 new villages

EMPOWERING VILLAGE LEADERS AGAINST GENDER-BASED VIOLENCE

AVAHAN conducted a series of orientation trainings for village key leaders, focusing on understanding gender, violence, and their impact on society. Over 9 batches, 341 leaders from 151 villages across 7 clusters participated, gaining insights into domestic violence and its effects. The training encouraged leaders to develop action plans to address gender-based violence.

Key Outcomes:

- 54 cases resolved at community level**
- 21 cases referred to police**

The training empowered village leaders to take an active role in mitigating domestic violence, promoting community-led solutions and reporting of social issues. This initiative has strengthened community engagement and response to gender-based violence.

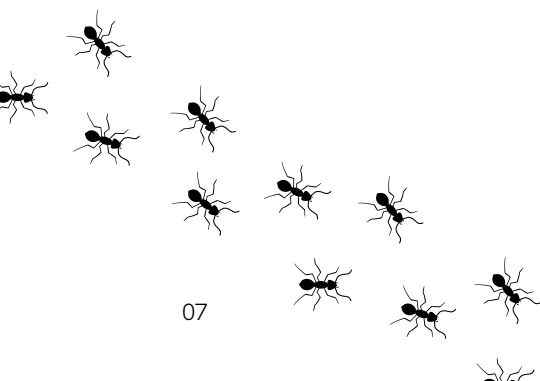

BUILDING OF SECOND-LINE LEADERSHIP:

In the last one year, the project has been able to build the perspective of the ant team on gender and equity. The senior leadership of the project have been engaged in formulating project monitoring and learning system as well as in building project MIS. The project management team have undergone training on project cycle management, monitoring and learning framework and documentation.

The Project Management Team have had the opportunity to visit and learn from the pioneering rights- based organisation, MASUM (Mahila Sarvangeen Utkarsh Mandal), Kagad Kach Patra Panchayat, a union of a waste pickers and IoFC (Initiatives of Change), a global organization dedicated to fostering trust, ethical leadership, and reconciliation across societal divides in Maharashtra. The team gained knowledge of how different NGOs working on women's rights provide immediate support to the women who are in distress, especially those who are at higher risk of suicide. Further, the team gained new knowledge & insights on working with different stakeholders on gender justice. It has been an enriching experience for the team.

EMPOWERING GRASSROOTS WOMEN LEADERS WORKSHOP

A 2-phases residential workshop was held in September 2024 for 26 women leaders on the first phase & 28 on the second phase and from 18 village organizations. The workshop covered topics such as:

- Gender & Leadership
- Gender-Based Violence
- Law (PWDV Act)

The participants also visited the Sakhi One Stop Centre and District Child Protection Office, gaining practical insights into reporting cases and supporting survivors.

KEY OUTCOMES:

- VO members handle DV cases sensitively
- VOs independently organize campaigns and raise voices against injustice in their communities.

ONE BILLION RISING CAMPAIGN:

Conducted One Billion Rising Campaign in the five schools of Ulubari Cluster reaching out to nearly 1400 students (Boys 600; Girls 800). Did a flash mob along with the community adolescent group in all the five schools. Along with the flash mob, the team, provided an awareness on gender inequality, gender-based violence such as domestic violence, rape, abuse, exploitation, murder, trafficking etc. happening in the society every day. Also discussed that making the girls/women free from stress, violence and harassment will lead them to live peacefully in society which is very crucial for the betterment of the society as women are the real architect of our society.

INTERNATIONAL WOMEN'S DAY CELEBRATION:

On March 8th, the trained Akota VO members (Akota VO have received training on Gender Based Violence) from Patabari Cluster hosted a successful International Women's Day celebration. To amplify the event's impact, they invited key community leaders, including the village head, president, secretary, and student union representatives. These esteemed guests championed women's rights, sparking meaningful discussions on the significance of International Women's Day. Emphasizing gender equality, they fostered an empowering environment for women. The event featured an engaging game competition, promoting teamwork and participation.

With 120 women, men, and children in attendance, the program was a resounding success. Ekota VO's collaborative efforts with the community have significantly advanced women's rights and gender equality in the region.

International Day of Safe Abortion Day

An event in commemoration of the International Day of Safe Abortion was organised in Patabari Cluster, attracting 100 participants, including women and men. Doctor Injamul Hoque in-charge of the Community Public Health Centre, Ouguri joined us to raise awareness about women's health issues, the consequences of abortion, and the importance of safe abortion practices. Additionally, Advocate Azgar Ali participated in the event, providing insights into the legal rights and laws surrounding abortion and women's health. This awareness program empowered women to make informed decisions about their well-being by enlightening them about their health rights and promoting informed decision-making.

Key effects ✨

STRENGTHEN LOCAL SYSTEM TO SUPPORT DOMESTIC VIOLENCE(DV) SURVIVORS AND THEIR FAMILIES

Entry level village meetings were conducted in 53 new villages in the month of February, 2024. We reached out a total of 1325 (Men - 434, Women - 891). Of the 175 DV cases, 55 cases are reported and registered from new villages.

An orientation on understanding gender & violence and its impact was conducted with 341 village key leaders such as the Gaon Pradhan, Village President & Secretary, VDP (village defence police), VCDC Chairperson/Members and the active village members participated in the workshop. The orientation programme was conducted in 9 Batches at 'Udangshri Dera -the ant campus', Rowmari. Total villages covered were 151 villages from the 7 Clusters-Rowmari, Amguri, Ulubari, Deosri, Patabari, Kuklung and Basugaon. Key leaders after the orientation training gained insights on DV & its impact. After this workshop a total of 54 cases such as DV, Child Marriage and Elopement are handled/solved by the key leaders and 21 DV cases were referred by the key leaders to the police and to the ant team.

A workshop on "Empowering Women in Governance" was conducted for 24 women representatives of VCDC (Village Council Development Committee) from 24 panchayats in Chirang district. The session aimed to enhance their leadership capacity, public speaking skills, and understanding of roles and responsibilities to effectively participate in decision-making.

Key effects

ACTIVE CIVIL SOCIETY PROMOTES GENDER EQUALITY AND ENDING VAWG

An annual interfaith Religious conference was organised which served as a vital forum for dialogue among diverse faith, fostering collaboration and mutual understanding. This gathering brought together religious leaders, scholars from different faith such as the mufti & Imam, bishop of boro evangelical lutheran church, pastor and preacher from catholic church, preacher and follower of brahma and sanatan dharma to explore the intersection of religion and gender. The discussion focused on scriptural text and interpretation, it also provided a space to challenge the discriminatory norms and promote inclusive spiritual leadership, and strengthening interfaith solidarity in advancing gender justice. 32 faith leaders attended the conference.

A district-level workshop on gender, law, and violence was organized on December 1, 2024, with the district-level representatives of student unions. The discussion focused on strategies to bring more young women in the leadership. It also explored how the ant and the student union can collaborate on development initiatives at the village level. One of the key discussions in the meeting was the importance of fostering safe and violence-free homes for child development, aligning with the student union's mission to advocate for and support students.

In July-August and November 2024, a 3.5-day residential workshop empowered 269 young leaders from 7 student organizations in Chirang district, Assam. Conducted in collaboration with IoFC, the workshop focused on leadership, gender roles, and conflict management. Participants showed positive behavioral changes, quitting bad habits and supporting household chores, promoting gender equality and social responsibility. Organizations included AAGSU, AASAA, AKRSU, AABYSF, ABMSU, ABSU, and AAMSU.

Key effects

SENSITIZED GOVERNMENT INSTITUTIONS RESPOND TO VAWG

One day workshop on Empowering Women in Governance was held on 11th December, 2024. Total Participants present were 26. The participants present were Jeevika Sakhi, Pashu Sakhi, Krishi Sakhi, Bank Mitra and CRP-EP covering 26 participants from two blocks of Chirang district – Sidli and Boro Bazaar. Key discussion of the workshop was on Sex and Gender difference, Gender Equality, Gender Roles, Counselling Skills and Related Laws.

On September 28th and 30th, 2024, a workshop for 107 ASHA workers was conducted in Chirang district, focusing on gender and violence. Led by Dr. Sunil Kaul, the program empowered ASHAs to identify and support domestic violence survivors. ASHAs pledged to maintain records of cases, refer them to authorities or organizations like the ant when necessary, and prioritize DV discussions in monthly meetings. Following the workshop, 5 domestic violence cases were successfully referred by ASHAs, showcasing the initiative's positive impact.

In a bid to strengthen workplace safety and promote inclusivity, a comprehensive workshop on the Prevention of Sexual Harassment (PoSH) Act and the SHe-box Portal was held at the Krishi Vigyan Kendra in Chirang on 6th December, 2024. The total participants present were 62 covering all the Government Depts. of the Chirang District – BDOs, Assam Police, Irrigation, Agriculture, ASRLM, Sports, Fishery, Health, Social Welfare, PNRD etc. The event was organized by the Department of Women & Child Development, Chirang, in collaboration with the ant, and the Chirang District Administration. The program was graced by the presence of the Chirang District Commissioner Jatin Bora. The key discussion was on the critical role of government and police officials in reinforcing the Internal Complaint Committees (ICCs) within various departments to combat sexual harassment.

STORIES OF CHANGE

Sania's Journey from Domestic Violence to Hope:

Mrs. Sania (name changed), a 38-year-old survivor of domestic violence, hails from the village of Huthuti (name changed) under the Amguri cluster in Chirang District, Assam. She married Aman (name changed) in 2001 in a love marriage and together they have three children - two daughters and a son. Their eldest daughter is now married, leaving Sania and her two other children in the family. The family's primary source of income has always been daily wages, with Sania and her husband working tirelessly to make ends meet. For the last 19 years of her marriage, life seemed happy. However, things began to change when Sania and Aman moved in with his parents in a joint family, and that's when the violence started.

In May 2024, her in-laws began to scold her for no apparent reason, soon accusing her of various false allegations, such as not taking care of them and asking them to move out of the house. These accusations were passed on to Aman, who, influenced by his parents, began to treat her cruelly. The violence became both physical (slapping, kicking, and twisting arms) and emotional (verbal abuse) and, over time, it also took an economic toll (not providing financial support or daily needs) on her. Despite the abuse, Sania held onto the hope that things would improve, but as the days passed, the situation only worsened.

On June 14th, 2024, things reached a breaking point when Sania visited her parental home and, upon returning late, was brutally beaten by her husband. He even threw her out of the house. Devastated, Sania sought refuge at her parental home and stayed there for two months. Throughout this time, there was no response or attempt at reconciliation from her husband or in-laws. Feeling helpless, Sania reached out for help to Hasina Ahmed, a staff member of the ant AVAHAN project. Hasina quickly took action and called for a meeting, bringing together the local response group and village key leaders to mediate the situation. The meeting provided Sania and her husband with much-needed family counseling. Both parties agreed to work through their differences and continue their married life together with a commitment to happiness and mutual respect.

The response group offered counseling to Sania and her family and conducted regular visits to ensure her well-being. Over time, Sania noticed significant changes in her husband's behavior, and the violence stopped. He became more understanding and supportive, and the couple started to rebuild their relationship on a foundation of trust and respect. Today, Sania is living happily with her family, and she attributes much of this transformation to the intervention of the ant. She says that the support and counseling they provided not only changed her life but also saved her marriage. There are no longer any issues between her and her husband, and she is grateful for the help that has given her a second chance at happiness.

Change*

STORIES OF CHANGE

Change Story on Paschim Dawaguri Response Group:

In Paschim Dawaguri, a small village in Chirang District, Assam, the ant organization tackled the pervasive issue of domestic violence through its AVAHAN program. Initially, the village head opposed the efforts, fearing disruption to traditional dynamics. However, the ant persisted, engaging with the community and providing support. In 2024, the ant revisited Paschim Dawaguri, meeting with leaders who granted permission for a meeting. The ant provided gender training, focusing on promoting gender equality and addressing domestic violence. This training had a profound impact, and a Response Group was formed, comprising local leaders and community members.

The Response Group became instrumental in resolving social issues, addressing 20 cases of domestic violence and child marriage. Collaborating with local authorities, they provided support to women and children. The village head, once opposed, now actively supports women and children, promoting gender equality. The ant's efforts have transformed the village, creating a safer environment where the community works together for fairness and respect.

A notable success was an evening film screening campaign, mobilized by the Response Group, where around 100 men and women participated. This initiative sparked meaningful discussions and raised awareness about domestic violence. The story of Paschim Dawaguri serves as a powerful reminder that change is possible, even in challenging contexts. With persistence, patience, and commitment to promoting gender equality, it is possible to create a more just and equitable society for all. The village's transformation demonstrates the impact of dedicated efforts to address domestic violence and promote women's rights, inspiring hope for a brighter future. The ant's work in Paschim Dawaguri showcases the potential for positive change campaign - evening film screening where around 100 men & women participated.

FOREST LEARNING CENTRE(FLC).

Learning Ecosystem Augmentation Project aims to provide access to quality education to the children of the forest fringe villages area, bordering with Bhutan where there is no access of government school, by setting up community-run learning centers, providing education volunteers, training, and liaising with the government. There are 16 Forest Learning Centers (FLCs) and 2 Model Learning Centers (MLCs), that have been established successfully and are currently operational. There are 736 children enrolled in these learning centers, of which 357 are boys and 379 are girls.

Key Highlights ✨

- With the funding support from Apraava Energy Provision of Toilets and Drinking Water Facilities at Forest Learning Centers: This initiative directly benefited 736 individuals (379 girls and 357 boys) and 21 staff members.
- Plantation in 5 Forest Learning Centres to generate income. The Community of each forest learning centre is responsible for the maintenance and care of the plantation. The teachers will be responsible for keeping the SMC informed on the upkeep of the plantation.
- Vikramshila as the technical partner in providing capacity building for teachers on the following
 - Introduction of ultimate frisbee
 - Events celebration and Summer camps

Teacher Training for Forest Area Learning Centers

Vikramshila conducted two phases of training for 21 teachers (14 male, 7 female) of Model Learning Centers in forest areas:

1. Classroom Makeover Training (July 11-13, 2024): Focused on transforming learning spaces.
2. Subject Pedagogy Training (July 16-18, 2024): Enhanced teaching skills and methodologies.

These trainings aimed to improve educational outcomes for students in these areas.

Teaching Learning Material (TLM) Mela

A one-day TLM Mela was held on November 18, 2024, at Laimuti FLC, attended by 206 participants, including 176 students and 21 teachers. The objectives were to:

- Raise awareness on the importance of TLM
- Enable children and teachers to use TLM effectively
- Facilitate observation and exchange learning

The event brought together students, teachers, and stakeholders to enhance teaching-learning experiences.

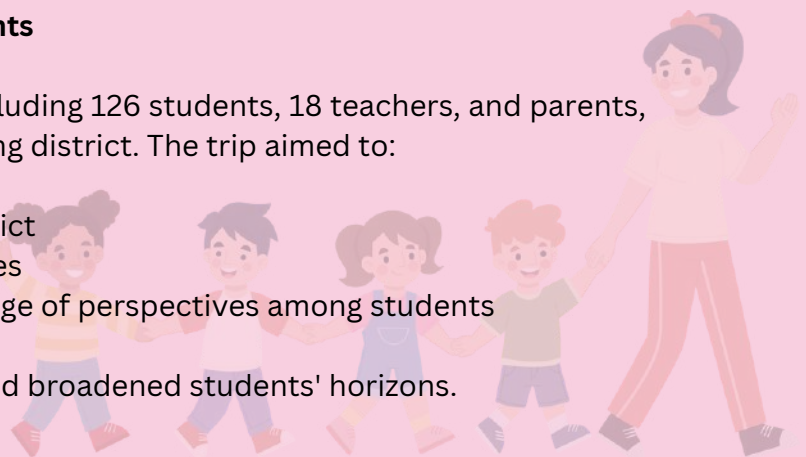

Study Trip for Forest Learning Center Students

On December 30, 2024, 150 participants, including 126 students, 18 teachers, and parents, embarked on a study trip to Kajalgaon, Chirang district. The trip aimed to:

- Provide practical knowledge about the district
- Motivate and inspire students in their studies
- Foster collaboration, teamwork, and exchange of perspectives among students

The trip enhanced the learning experience and broadened students' horizons.

Educational Exposure Visit for Teachers

On February 26-27, 2025, 14 teachers (11 male, 3 female) from Forest Learning Centers and Model Learning Centers visited BIDS(Bosco Integrated Development Society), Shillong. The visit aimed to:

- Understand strategies for library sessions, child-friendly classrooms, and community engagement
- Learn about Continuous and Comprehensive Evaluation (CCE) to enhance educational quality and student engagement

The visit enhanced teachers' knowledge and skills to improve school development.

Clustered Holiday Camps

1. Summer Camp (Aug 19-20, 2024): 730 participants (357 male, 373 female) engaged in individual games, group activities, and a Frisbee tournament.
2. Winter Camp (Mar 12-13, 2025): 679 participants (355 male, 324 female) took part in various activities.

Objectives:

- Develop social skills
- Build confidence
- Foster leadership and teamwork
- Encourage creativity and physical activity

These camps promoted holistic development and fun learning

Weekly Ultimate Frisbee

- 12 times of Weekly Frisbee sessions on every Wednesday was conducted at Laimuti & Sitonaguri Forest Learning Center Playground.

Total participants -499, Boys-285 and Girls- 214.

• Objective: --

- To Enable the children of Forest Learning Center to develop Social Skill, Confidence building, Leadership role in team work, creativity & physical activity.
- To introduce the basic skills of Frisbee and gameplay.

STORY OF

Transforming Young Lives: Sojit's Journey Through 'Social Talk' at Mainaopuri Forest Learning Center

In the 2024-25 academic session, Sojit, a X-year-old student from Mainaopuri village, lives with his brother while his father works outside the state and his mother left him at a young age. He studies in Class IV at "the ant" support community-run learning center, Mainaopuri Forest Learning Center.

Initially, Sojit was irregular, and would distract other children, bully during class hours, and disregard teacher instructions. To address these challenges, "the ant" - Forest Learning Centre team introduced the "Social Talk" activity, a monthly discussion-based program covering social issues, learning importance, good manners, health, hygiene, and moral values.

Through regular "Social Talk" sessions, remarkable progress has been observed in the children, including Sojit. He now attends classes regularly, respects peers, and takes care of younger students. This noticeable change in behavior and manner is a testament to the effectiveness of the "Social Talk" activity in promoting positive development among the children.

✨Coloring The Rainbow(CTR) ✨

Coloring The Rainbow (CTR) initiative engages young people from diverse communities through Ultimate Flying Disk sports to mitigate communal violence, a significant issue in the area. Children and youth from different communities regularly play together, fostering understanding and amity. The project brings together young individuals from at least three religions and three mother tongues, living in close proximity, to play together regularly. Through sports, the project aims to raise awareness and promote collective action on issues such as child labor, trafficking, and substance abuse, ultimately realizing the rights of children, a key objective of the initiative.

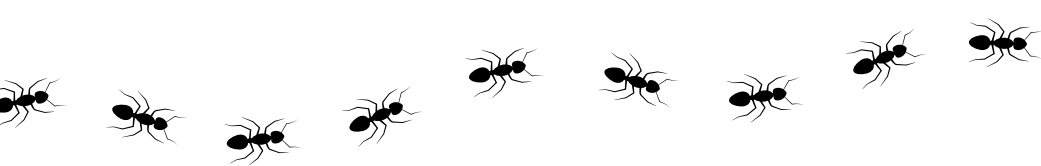

This project aims to explore and evaluate various renewable energy sources suitable for implementation in urban environments. The focus is on solar, wind, and geothermal energy options, assessing their feasibility, efficiency, and potential environmental impact.

Monthly Objectives:

- Complete site surveys for selected urban areas.
- Collect and analyze preliminary data on energy output from solar and wind sources.
- Identify potential locations for geothermal energy testing.

Capacity Building

Training Programs:

1. June 20-22, 2024: 3-day training on Digital, financial, and soft skills was organised at "the ant" (Mushroom Hut), Rowmari, in collaboration with SBI Foundation and CTR project.

2. July 26-29, 2024: 4-day workshop on Digital and financial awareness was organised in Basugaon cluster

3. September 6-8, 2024: 3-day training on mobile photography and videography was organised at "the ant" campus

Staff Exposure Visit :

A staff exposure visit to YUWA India Organisation in Ranchi was completed with 8 participants (1 female, 7 males), including 1 SBI fellow. The visit involved activities like home visits, interactions with coaches and teachers, and training sessions, aiming to understand YUWA's operational model, observe sports and educational programs, gain insights from beneficiaries and staff, and identify best practices that can be replicated or adapted in other contexts.

Centrally Coach Training Camp:

Four Days coaches Training camp was conducted from 28th October -31st October 2024, where total of 41 participants participated in the training. The training was facilitated by Manoj Kumar a development professional. A major focus of the sessions was on establishing group agreements, setting goals, communicating effectively, solving problems, identifying emotions, and managing emotions in an emotional way. The workshop's purpose was to give participants the tools they need to better understand themselves and collaborate effectively within a team environment to work more efficiently.

Training Child Safeguarding and gender:

Child Safeguarding training program held on 23rd June 2024, at the IDeA training hall, the ant campus Rowmari. This Child safeguarding training program was conducted for the project staff and coaches to make them aware about the norms of safeguarding policy to work with children and young people. For this program, Mr. Rwmwi Rwmwi Basumatary had been invited as a resource person. Total of 29 participants, (Male- 20, Female-9) including the staff participated in the training.

Gender training was conducted on 28th - 30th March 2025 where 8 staffs and 7 youths attended the training. The resource person was Nizra Narzary and Anil Brahma from the ant project AVAHAN.

Coach Exposure Visit:

The coach exposure visit was conducted on 20 - 23rd March 2025 in Faith Foundation, where 16 staff participated in the visit. The primary goal of this exposure visit was to provide coaches with insights into coaching techniques, community engagement strategies, and leadership development programs that can be adapted and implemented within our local context. Through this visit, we hope to build our coaches' capacities in a way that contributes to the overall development of our program beneficiaries, particularly in the areas of sports education, life skills, and youth leadership.

Demonstration of Spirit Of The Game

Cluster level MRT Tournament

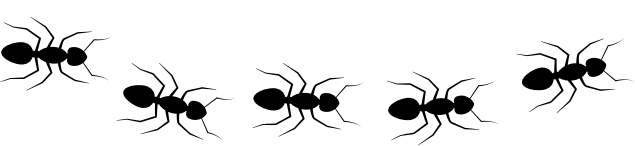

16 MRT tournaments was organised in 6 cluster of Udalguri and Chirang districts. A total of 2472 children from various communities, including Santali, Boro, Garo, Assamese, Bengali Hindu, Bengali Muslim, Uraon, Rajbongshi and Nepali, participated in the event. The tournament promoted inclusivity by engaging children from different backgrounds and creating a platform for community interaction and physical development. As a token of participation, all participants were given pens, acknowledging their enthusiasm and effort in the tournament.

Centrally Rainbow Tournament

The Central Level Ultimate Frisbee Tournament took place on the 19th and 20th of October 2024 at the Ulubari ME School playground in Chirang district. Organized by the ant (action northeast trust) and led by Anand Verghese from UPAI, the event served as a platform for young players from across Chirang district to demonstrate their skills and compete for selection to the upcoming Northeast (NE) Ultimate Frisbee tournament. A total of 8 teams participated, reflecting the growing interest in Ultimate Frisbee as a sport for youth development in the region. comprising boys and girls aged between 15-25, male 82 and female 80 participated in the tournament.

SIFUNG

Sifung aims to revive and promote Bodo traditional dance, music, and crafts and help build economic opportunities for musicians, dancers, and practitioners. The project is engaging with 658 children and youth in 4 ME schools and 6 branches across 40 villages, in Chirang District, Assam through weekly music and dance sessions, performing cultural dance, music and theatre during community programs, festivals, district and regional events. The project also focuses on exploring potential opportunities, building their capacities, and creating income-generating avenues for dancers, musicians, and practitioners through instrument-making and eri rearing.

Key Highlights

Educational Initiatives

ME Schools:

- 4 operational schools with 115 students (Boys: 39, Girls: 76). Where ongoing weekly classes on traditional dance and music, covering 4 dance forms: Basic, Bagurumba, Mwsaglangnai, Daosri Delai, 4 music forms.

Branches:

- 6 operational branches with 534 students (Males: 79, Females: 455). Weekly practices on traditional dance and music, covering: Basic, 4 dance forms, 4 music forms (including Bagurumba, Mwsaglangnai, Daosri Delai).

Sifung Harimu Afad have reached out to over 658 Children and Youth and engaging them in weekly music and dances sessions.

74.24% increase in enrolment among students.

43 weekly class sessions held on 2024 (July-Dec), 20 weekly class in 2025 (Jan-March). 77 weekly sessions conducted 587 participants attended the session.

6 Sunday camps held in (July-Dec), 11 practice sessions held in (Jan- March) 2025

3 Eri rearing groups formed and started

- 2 Eri rearing group was formed in January 2025 and just started rearing, with no harvest or sales yet.

Events & Activities

Training in making & repair of musical Instruments

A workshop was conducted in September 2024 on Serja (musical instrument) making, 12 trainees all male attended the training.

Capacity building on eri cocoon rearing

Basic Eri rearing training was provided to 9 women beneficiaries and 10 youths (8 men, 2 women). 2-day practical training and exposure visit to Udalguri was organized to give them hands-on experience.

Workshops for Troupe Leaders

Training of Trainers for music and dance was conducted in October 2024 both theory and practical Basic, Bagurumba, Mwsaglangnai, Jarafagla, Bardwi Sikla, Sikri Sikla and Na Gurnai). 40 troupe leaders attended the workshop.

2nd Sifung Cultural Festival

The 2nd Sifung Cultural Festival was held on 28th and 29th of January 2025. Children and Youth from 4 Schools and 6 Branches competed in the music and dance competitions.

Many dignitaries of the region also graced the festival with their presence. Approximately 900 people attended the festival out of which around 400 attended as participants and 450 as an audience.

STORY OF CHANGE

In the Northwestern part of Chirang district, near the borders of Bhutan, lies the region of Shantipur. Once nascent in cultural participation and practices, this area has undergone a significant transformation. The establishment of Shantipur branch Sifung Harimu Afad in August 2024 by Central Sifung Harimu Afad marked the beginning of a new era. This organization brought with it a wealth of knowledge and opportunities for children and youths to learn about Bodo culture and tradition.

As a result, the region witnessed a surge in enthusiasm among young people. Children and youths from approximately 12 villages began to participate actively in cultural training and practices. They learned traditional dance forms like Mwsaglangnai, Bagurumba, and Daosri Delai, and even performed at various programs like Bathou Ashram ni Domasi Fwr bw, Conference of Bodo Students Union, Bodo Sahitya Sabha Conference, Public Meetings, Bodoland Riders Meet Program. The newly formed branch only required little aid in performing at the first event. The events following the first had been independently taken up by Shantipur branch Sifung Harimu Afad.

The impact of Shantipur Sifung Harimu Afad has been profound. Youths who were once idle or in need of direction now spend their time learning and preserving their cultural traditions. The organization has created a space for young people to express themselves, showcase their talents, and connect with their roots. As a result, the region has witnessed a positive change in the mindset and behavior of its youth.

The transformation in Shantipur is not limited to the young people alone. The entire community has come together to support and celebrate their cultural heritage. Parents and elders have been enthusiastic about their children's participation in cultural activities, recognizing the importance of preserving their traditions. The region has also seen an increase in community events and festivals, which has helped to promote social cohesion and cultural exchange.

Today, Shantipur is a testament to the power of cultural preservation and community engagement. The region's transformation is a shining example of how dedicated efforts can bring about positive change and empower young people to become custodians of their cultural heritage. As Shantipur continues to thrive, it serves as a beacon of hope for other communities seeking to preserve their cultural traditions and promote social change.

The story of Shantipur is a reminder that cultural preservation is not just about protecting the past, but also about empowering the future. By providing young people with the opportunity to learn about and engage with their cultural heritage, we can help them develop a sense of identity, purpose, and belonging. This, in turn, can have a positive impact on their mental and emotional well-being, as well as their social and economic prospects. The region's transformation is a shining example of how dedicated efforts can bring about positive change and empower young people to become custodians of their cultural heritage.

Thengphakhri Model School Initiative (TMSI)

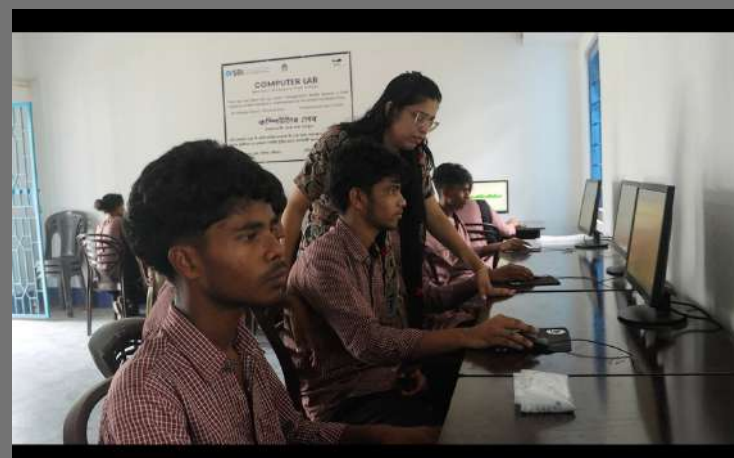

Thengphakhri Model School Initiative (TMSI) is an educational project started in January 2025, aimed at transforming the learning landscape for rural students in Mongolian and Majrabari High School. This initiative focuses on establishing model schools that serve as benchmarks for quality education, upgrading infrastructure, adding extra curriculum like separate computer class, science lab innovative teaching methods, and holistic developmental, reasonably priced solutions.

School Infrastructure: Repair of classrooms & building:

The construction and renovation of school buildings for both Mongolian High School and Majrabari Nowapara High School have been successfully completed. The renovation work included replacing tin roofs, repairing windows, doors, plastering existing walls, ceiling to all the classrooms and restoring the flooring at both schools. All work was completed by March 25, 2025 and they are usable condition.

The construction of a new boundary wall and the repair of the veranda floor are currently on progress at Majrabari High School. Procurement of bricks, cement, and other materials has been completed, and an agreement has been signed with the mason the work is on progress. At Mongolian High School, construction work of a dining shed and a hand washing place, drainage and additionally, repairs to the school veranda floor are ongoing.

SOME GLIMPSES OF THE SCHOOL

Integrated Tribal Development Project

Shantipur(ITDPS)

ITDPS (Integrated Tribal Development Project, Shantipur) is a wadi (backyard orchard) project under TDF (tribal development fund) Nabard. It is purely on plantation of fruit plants. The primary crop is Amrapali mango, second crop is Red apple ber and border plants are lemon and neem. There are three important components under this project. These are orchard development, intercropping, soil and water conservation. Total 200 farmers will be benefited under this project. 180 farmers will be directly supported through plantation in 1-acre of land and 20 landless farmers will be supported through weaving and other income generation activities. The main objective of the project is to provide support to 200 tribal families of 8 villages under Shantipur VCDC for generating sustainable livelihood opportunities through wadi project.

Key Highlights ✨

- Established 56 orchards in 168 Bighas of Land in 7 villages. The main crops are Mango and Apple Ber and Boundary crops are Lemon and Neem. Mango (Amrapali): 5040, Red Apple Ber: 5600 Nos, Assam Lemon: 2240 Nos, Jati Neem: 448 Nos
- 56 farmers have laid out dry fencing. They used bamboo and fishing net to protect from domestic animals i.e cow, pig, goat, rabbit.
- 43 wadi farmers sowed black gram for soil fertility. Other farmers sowed sesame. An amount of Rs. 246,160 has been received from 3077 kg harvested black gram.
- Completed installation of 2 Solar powered Irrigation Machinery. One is at No 3 Odalguri and another one is at No 2 Kusungdwisa.

Training & Capacity Building

Training of PIA Staff and exposure visit

An exposure visit was completed to JVM at Nagrijuli project on 27th and 28th of April, 2024 to understand and learn the technologies required in horticulture. We met the project team and discussed the orchard and its issues and challenges.

Participated in the training of the TRIBES project at AAU Jorhat from 29th January to 1st February 2025 organised by Regional Office Nabard. The training was on all aspects and activities of the TRIBES project and its management.

Farmers training/Demonstration

Farmers training has been organised in two batches. The first batch training was organised on 3rd of June, 2024 at No 4 Odalguri and second batch training was organised on 6th of June, 2024 at Kaola Bazar. Mrs Mondakini Bhagawati subject matter specialist, horticulture KVK was the resource person. Total 45 participated in the training.

A demonstration training on digging pits was held on June 7, 2024, at No 2 Odalguri farm of Mr. Narendra Narzary. The program featured Ziaur Rahman, owner of Masood Nursery, and included participation from all PTDC members. The objective was to equip PTDC members with the knowledge to lead and guide other farmers on digging pits

Vermicompost Making Training was held on July 15, 2024, at Kaola Bazar, led by Mr. Poran Kishore Dutta (Soil Science Specialist, KVK). Focused on vermicomposting process and importance.

Bee Keeping Training: A 2-day training organized by the District Agriculture Office, held at KVK Conference Hall.

The exposure visits for farmers were conducted in three phases, engaging a total of 66 participants, including 57 males and 9 females.

The first phase involved a visit to Akbar Ali Ahmed's farm, where 14 farmers observed apple ber plantation and maintenance practices. Akbar Ali Ahmed, a progressive farmer and agriculture entrepreneur from South Deulguri, has successfully cultivated dragon fruits and was recognized with the National Millionaire Farmer Award.

In the second phase, 39 farmers along with 3 staff members visited Shri Sarbeswar Basumatary, a Padma Shri awardee from Panbari village. The objective was to learn from his experiences and life journey as a farmer, gaining insights from his contributions to agriculture.

The final phase involved a visit to Pabhoi Greens, focusing on organic farming practices. The farmers gained knowledge on bio-pesticides, natural compost making, pest management, soil conservation, and crop management. Pabhoi Greens, registered in 2003, emphasizes environmentally sustainable practices and features key components such as a seed bank, nursery and production, vermi compost, and fish breeding and reproduction.

Project Management & Sustainability

Formation of Village Planning committee

7 Village Planning committee has been formed. The main objective of the formation of village planning committee is to strengthen the farmers for village wise planning, implementation, monitoring and maintenance of the project. 1 village i.e simlabagan has not formed because the village was not ready for 1st phase (1st Year). They will be included in second phase (2nd year)

Formation of Project Level Tribal Development Committee

The Project Level Tribal Development Committee (PTDC) was constituted on May 4, 2024, for the Integrated Tribal Development Project Shantipur in Chirang District, Assam. The committee consists of 18 male and 6 female farmers from 8 villages. Key objectives include: Overseeing project development and progress, Registration as a Farmer Producer Company for marketing, business planning, and processing, Graduation to a Farmer Producers' Organisation (FPO) in the second/third year, Facilitating fund flow through a jointly operated bank account, Providing technical assistance and managing inputs, processing, and marketing after project completion.

Formation of Project Implementation and Monitoring Committee

The final phase involved a visit to Pabhoi Greens, focusing on organic farming practices. The farmers gained knowledge on bio-pesticides, natural compost making, pest management, soil conservation, and crop management. Pabhoi Greens, registered in 2003, emphasizes environmentally sustainable practices and features key components such as a seed bank, nursery and production, vermi compost, and fish breeding and reproduction.

BOOSTING AGROBIODIVERSITY FOR RESILIENT DEVELOPMENT AND WELFARE INITIATIVE

(BARDWI)

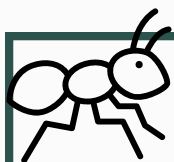

With an aim to create a self-reliant and environmentally conscious community where the sustainable use of indigenous edible and medicinal plants enhances food security, preserves biodiversity, and promotes natural farming practices, ant has started its new project “BARDWI” formed in Udalguri district from October, 2024.

COMMUNITY EXCHANGE PROGRAMS

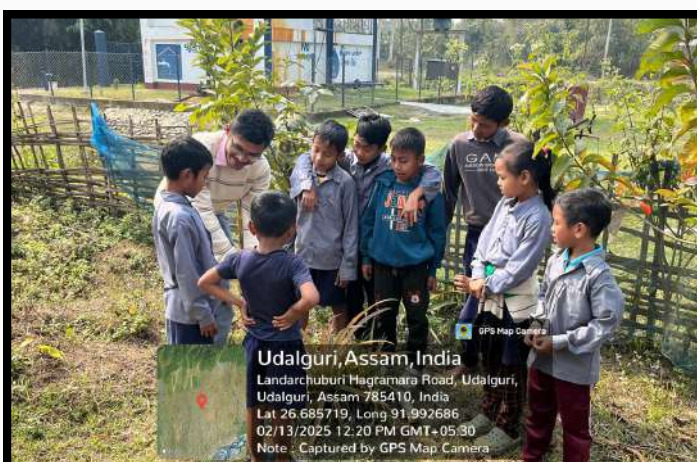

Various topics were discussed including -Food habits of Rabha community (Mainly consume rice in all the 3 meals, consumption of meat in daily basis, consumption of foods / vegetables available in and around village, prefer organic vegetables), Locally available vegetables and herbs (Viz- pada lota, mani muni, norsing, pudina, kosu, sojona, etc). Medicinal plants and it's health benefits (pada lota- used as a remedy for diarrhoea/stomach pain, sojona leaves – consumed by women after delivery to boost milk production). Changing food habits of the younger generation/children (present generation children prefer foreign foods eg- processed foods and started losing interest in traditional foods)

Traditional Ecological Knowledge and Biodiversity Awareness

Traditional ecological knowledge (TEK) is being transferred to young people in 15 villages through initiatives like biodiversity walks and classes. During a biodiversity walk, local plants such as curry leaf, neem, tamarind, moringa, and lekhwna were identified, and their health and environmental benefits were discussed. The classes, were also conducted based on an annual lesson plan, covered topics including agrobiodiversity, crop diversity (like various rice varieties), species diversity (such as maize, beans, cows, and chickens), and ecosystem diversity (agroecosystems like wetlands, grasslands, and forests), aiming to promote awareness and appreciation of biodiversity.

ADOPTION OF NATURAL FARMING PRACTICES

In the intervention villages, 1000 households have adopted natural farming practices. A workshop was conducted to emphasize the importance of groundwater conservation, and leaflets were distributed on water channelizing techniques for homestead gardens. Additionally, leaflets highlighting the benefits of natural farming were distributed to beneficiaries. Awareness was also created on vermi compost production, promoting sustainable agricultural practices.

DIVERSIFICATION WITH INTEGRATED MANAGEMENT FOR UPLIFTMENT OF PEOPLE'S LIVES (DWIMU)

Project DWIMU (Diversification with Integrated Management for Upliftment of People's Lives) is an initiative of the ant since 2023. It aims to uplift the lives of women weavers and sericulture practitioners in Udalguri and Mazbat Block of BTR Assam.

Key Highlights

More than 41,00,000 INR income generated through only 43 weavers.

-Insurance- 21 weavers were linked with PMJJBY and PMSBY Insurance scheme. The weavers will be benefited with 2 lakh in case of permanent physical disability or death.

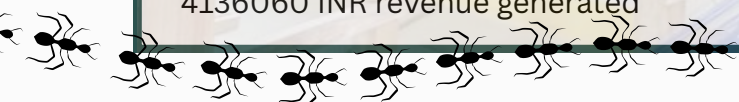

-Udyam Registration- Supported 13 weavers for Udyam registration

-Yarn Passbook: Supported 118 weavers to apply yarn passbook under Department of Handloom and Textile.

-Mudra Loan: Supported 16 weavers to apply Mudra Loan under Department of Handloom and Textile

-BTR Weavers registration: Supported 10 weavers for BTR weavers registration

- Revenue Generation: Products were sold through existing and new market network. In sericulture 17,29,124 INR of revenue generated and in Handloom 41,36,060 INR revenue generated

CAPACITY BUILDING OF THE STAFF:

The project team underwent various capacity-building initiatives, including a 2-day induction training for 5 staff members to understand the project's objectives, organization, policies, and values. Additionally, the team participated in multiple workshops, such as a 3-day gender training, GIS training for the MIS Coordinator, and sessions on business planning, natural dyeing techniques, and MGNREGA MIS quality assurance. Other notable trainings included MLE workshops, a workshop on CLF and PG, and a 4-day training on Jacquard installation for the cluster coordinator, all aimed at enhancing their skills and knowledge.

CAPACITY BUILDING OF WEAVERS

The project provided various capacity-building initiatives for weavers, including design training for 70 households on graph-making, design punching, and graphical design implementation on looms. Additionally, 9 households received 4-day Jacquard installation training, while 406 households were trained on modern warping drum techniques to increase efficiency and reduce labor. Other initiatives included exposure visits for 30 weavers to learn from local successful handloom weavers, Entrepreneurship Development Program (EDP) training for 31 beneficiaries, and Micro-Enterprise Development Program training for 30 households. Furthermore, 227 households received training on natural farming techniques, and 50 weavers received handholding support on warping, new designs, Jacquard use, and installation.

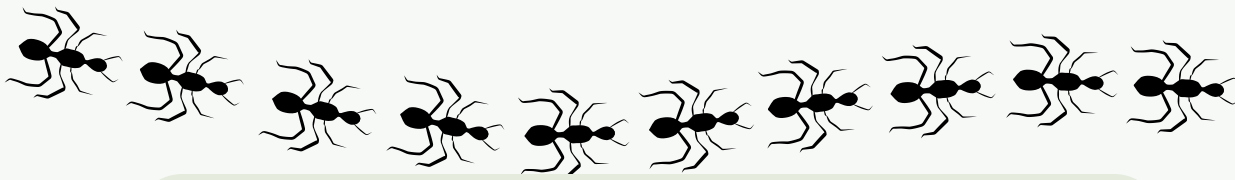

Asset Creation

The project created various assets for beneficiaries, including:

- Jacquard Distribution: 37 jacquards were distributed to individuals through clusters under a revolving fund model, with 0% interest repayment to support further asset creation. Installation support was also provided.
- Loom Distribution: 7 framed looms were distributed to weavers through clusters, with 2 additional jacquard looms mobilized through ASRLM, totaling 9 looms.
- Warping Drum: 6 warping drums were distributed to clusters, with repayment expected to support further asset creation.
- Solar Panel Distribution: 5 solar panels were distributed in convergence with BDF to enable evening work and improve living conditions.
- Demo Farms: 23 demo farms were established on 1.5 bigha land each for capacity building, with support provided for saplings, seeds, land preparation, and technical assistance.
- Plantation: Plantation was carried out with 179 households on 11.93 hectares of land, with 90 kesseru saplings distributed to each household.
- Intercropping with Sericulture: Intercropping was carried out with 395 households on 79 hectares of land, providing kesseru saplings, castor seeds, tapioca stems, and vegetable seeds.
- Vermi Compost Units: 23 vermi compost units were established in demo farms and villages for capacity building and demonstration.
- Entrepreneur Development: 6 entrepreneurs were developed in weaving and 2 in sericulture, providing employment opportunities and adopting new technologies.

CHANGE STORY

In the quiet lanes of Udalguri district, a woman weaver once practiced her craft on a traditional loom, her days marked by limited opportunities and modest returns. In the year 2023-24, her income stood at just ₹40,000, with only 40 to 50 days of productive work throughout the year. The constraints of outdated tools and lack of market access kept her talent and potential confined. This changed when she became a part of the DWIMU project by the ant, a focused intervention aiming to uplift women weavers through better tools, training, and market integration. Through the project, she received a framed loom and one Jacquard machine, tools that would prove pivotal in transforming her work. She was trained in operating the Jacquard loom, using the warping drum, and developing contemporary designs that appealed to wider markets. With cluster-level access to a warping drum and consistent guidance in design and marketing, she began producing Eri shawls using the Jacquard loom.

Her working days surged to 200–230 in 2024–25, a dramatic increase from the previous year. With greater efficiency and access to markets, she produced 170 Eri shawls in the year, earning an impressive ₹2,38,500 — nearly six times her previous income. Her success story is a powerful reflection of how the adoption of appropriate technology, skill development, and market linkages can empower rural artisans. What was once a traditional livelihood with limited scope is now a thriving micro-enterprise. Through DWIMU's support, this weaver has not only improved her income but also become a symbol of resilience, innovation, and hope for many others in her community.

Sustainable Livelihoods for Smallholder Farmers (Sus-FARM)

At the heart of the Sus-FARM (Sustainable Livelihoods for Smallholder Farmers) project lies a vision to empower smallholder farmers by promoting sustainable agricultural practices, ensuring food security, and enhancing the marketability of their produce. Through a combination of innovative farming techniques and strong community engagement, we are witnessing transformative changes in the lives of our farmers and their families.

Key Highlights ✨

40% Families in 22 villages have diversified and sustainable sources of income, leading to improved livelihoods and reduced vulnerability to economic shocks.

40%

60% increase in availability and accessibility of diverse food options for women and children

60%

30% families have food grain or liquid asset or cash saving to face any food crisis for 3 months.

30%

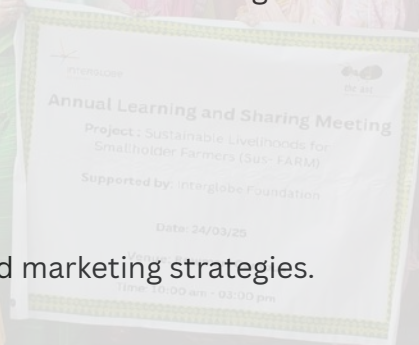

20% increase in sales through sales and marketing strategies.

20%

40% families increased in growing and consume food diversity.

40%

300 families from 22 project villages who have adopted diversified sustainable livelihood practices increased their income by 20%.

Events & Activities

Orientation of Soil testing of agriculture farmland

40 farmers gained knowledge on collecting soil samples, and 12 samples were sent to Charat Chandra Agricultural University for testing. After receiving the reports, 2 soil orientation sessions were conducted, attended by 76 farmers. A follow-up meeting with 6 farmers discussed their soil reports, highlighting soil composition and recommending suitable vegetables for their areas.

DEMONSTRATION OF INTEGRATED FARMING SYSTEM

The project has established 64 demonstration models of Integrated Farming Systems (IFS) in 22 villages. 20 farmers are practicing integrated farming, combining kitchen gardening, livestock, poultry, beekeeping, and agriculture. A total of 724 farmers are engaged in kitchen gardening, and 4 farmers received support for demonstrating goat farming integrated with agriculture. Additionally, 27 farmers attended 2 mushroom cultivation training sessions. 32 farmers received revolving funds for income-generating activities, with 28 for goat farming, 2 for pig farming, and 2 for kitchen gardening.

ORGANISE AWARENESS CUM VET. HEALTH CAMP IN COLLABORATION WITH VET DEPARTMENT

The project has made significant progress in livestock care and preventive measures in 22 villages. A total of 27 farmers were trained on livestock care and preventive measures. Two livestock vaccination camps were organized, attended by 37 people, resulting in the vaccination of 20 cows and 37 goats by 27 families. Consequently, no livestock mortality has been reported in the past 6 months. Moreover, at least 2-3 individuals from each village are now capable of handling livestock matters, and all 22 villages are accessing services from the Animal Husbandry department.

Exposure Visits for Experiential Learning

The project organized exposure visits to promote livelihood diversification and experiential learning. A total of 12 participants, including 7 staff members and 5 farmers visited MASK organization in Tezpur. Additionally, 12 participants, comprising 8 farmers and 4 staff members, visited the Development Research Communication and Services Centre (DRCSC) in Kolkata, focusing on seed banks, integrated farming, and biogas. These visits motivated 22 farmers to adopt livelihood diversification processes.

Promotion of diversified kitchen gardens model

724 farmers practicing kitchen garden, 6 – 7 varieties of seeds are distributed each season to farmers practicing kitchen gardening. 2 farmers received revolving fund for kitchen gardens, 214 farmers received fencing net, 38 farmers received 4 grow bags each for kitchen gardening, 30 farmers received mini spray machines.

DEMONSTRATION OF BIODEGRADABLE WASTE MANAGEMENT AT THE HOUSEHOLD LEVEL

The project has made progress in biodegradable waste management, with 162 farmers installing biodegradable units and 84 practicing waste management at the household level. 128 farmers have been trained in managing biodegradable units. Additionally, 10 farmers have constructed concrete vermi compost pits in 4 villages (Ganespur, Koraisali, Thaisouguri, and B. Batabari). An exposure visit to Sistema Bio in Barpeta District, Assam, was conducted for biogas installation, but implementation is pending due to budget constraints, as Sistema Bio's target of 100 farmers exceeds the project's budget.

CAPACITY BUILDING TRAINING ON INTEGRATED PEST MANAGEMENT AND BIO-PESTICIDES

Our gardening initiative has empowered 640 farmers with integrated pest management skills, with 85 farmers receiving specialized training. Additionally, 162 farmers are practicing biodegradable waste management. We've also supported 30 women-headed households and who were engaged in mushroom farming and kitchen gardening by providing them with mini hand spray machines.

ToT on Linking Agriculture, Nutrition and Natural resource Management (LANN):

Our team has built capacity in nutrition and healthcare through various initiatives. We've trained 17 staff and volunteers on LANN, with 10 village volunteers now leading sessions. Additionally, 18 community resource persons and staff members learned to measure BMI and conduct haemoglobin tests. Four community resource persons and four staff members also attended a 3-day training on Maternal and Child Health at CINI, Kolkata, enhancing their skills in healthcare support.

Village level sessions on LANN:

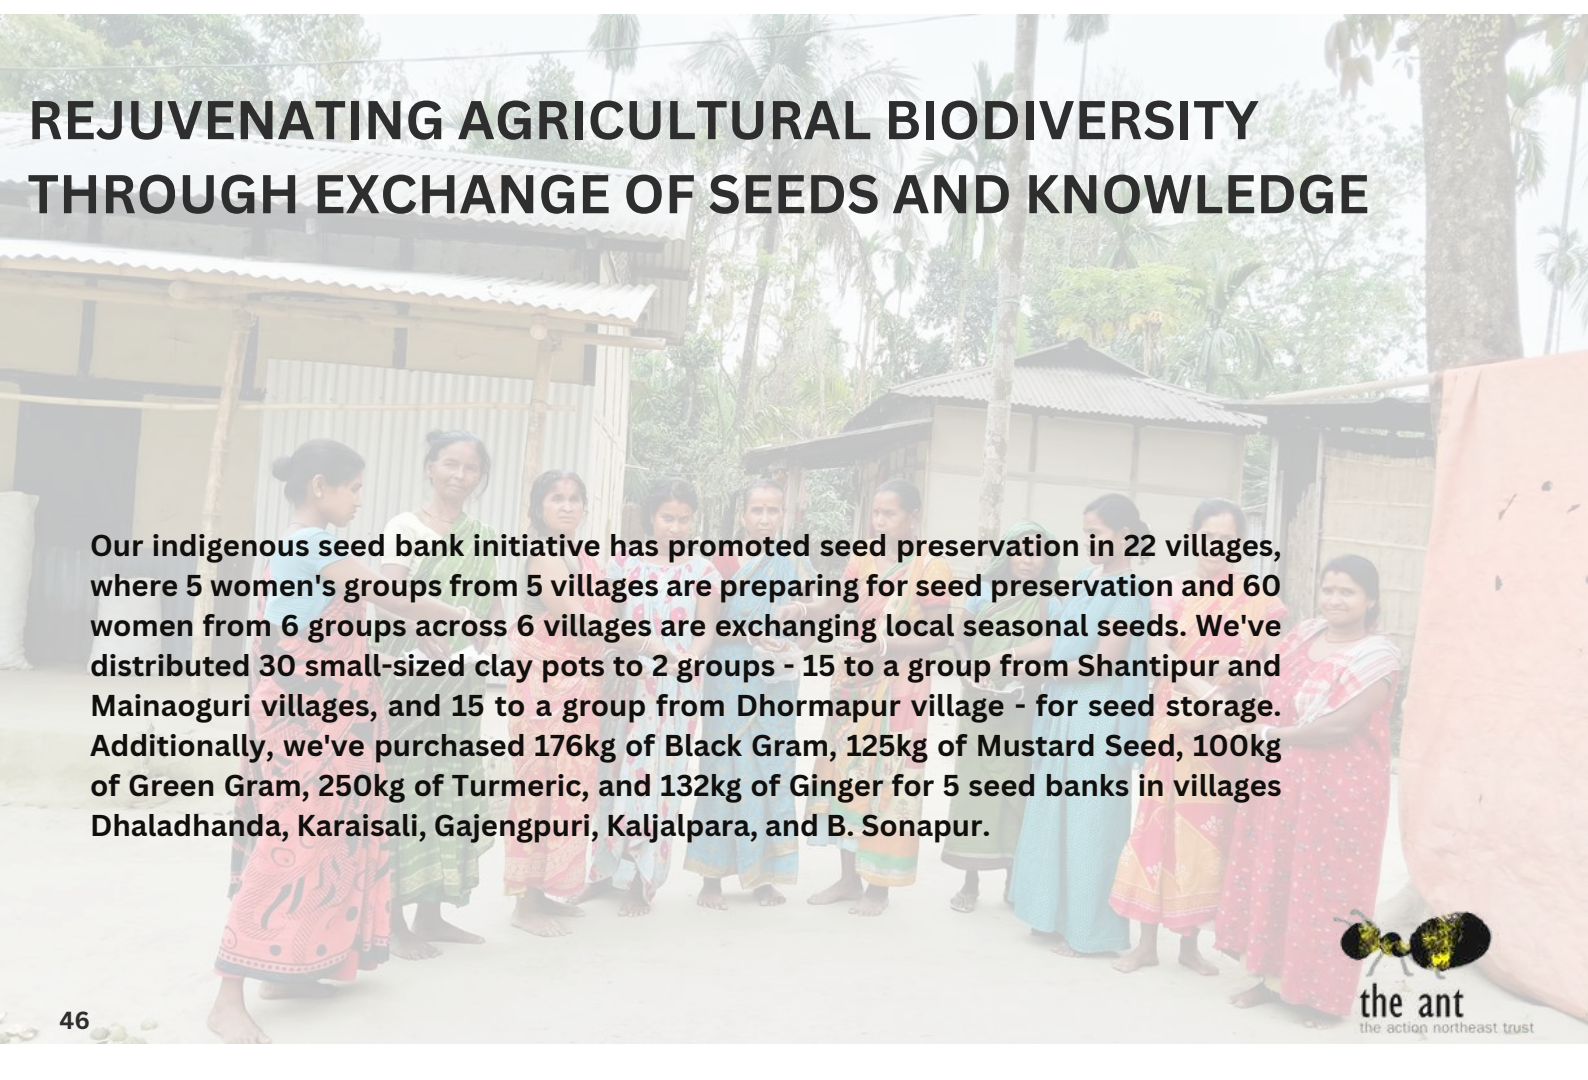

Our nutrition initiative has made significant progress, with LANN sessions held in 22 villages, including 9 villages where 83 mothers of malnourished children attended and gained awareness on nutrition and the importance of the 1000-day window. We've also conducted follow-ups with 37 malnourished children, provided home-based demonstrations on nutritious food, and distributed Jujubi fruit plants to 18 households. Additionally, we've supported 95 women identified with anemia through awareness talks and distributed 1-month iron supplements to 66 women.

TRAINING ON MARKET- ORIENTED PRODUCTION AND POST-HARVEST HANDLING PRACTICES

Our capacity-building initiatives have empowered farmers with new skills: 60 farmers learned production and post-harvest handling techniques, 28 farmers (4 men, 24 women) from 6 villages attended soap-making training, and 11 farmers received training on marketing and post-harvest handling practices. Additionally, 2 staff members gained experiential knowledge on biogas operations through a visit to Purobi Dairy.

REJUVENATING AGRICULTURAL BIODIVERSITY THROUGH EXCHANGE OF SEEDS AND KNOWLEDGE

Our indigenous seed bank initiative has promoted seed preservation in 22 villages, where 5 women's groups from 5 villages are preparing for seed preservation and 60 women from 6 groups across 6 villages are exchanging local seasonal seeds. We've distributed 30 small-sized clay pots to 2 groups - 15 to a group from Shantipur and Mainaoguri villages, and 15 to a group from Dhormapur village - for seed storage. Additionally, we've purchased 176kg of Black Gram, 125kg of Mustard Seed, 100kg of Green Gram, 250kg of Turmeric, and 132kg of Ginger for 5 seed banks in villages Dhaladhanda, Karaisali, Gajengpuri, Kaljalpara, and B. Sonapur.

Story of change

Manjubala Nama Das, a 50-year-old housewife from No. 2 Dhaladanda village in Chirang district, underwent a remarkable transformation after the intervention of the SUS Farm project in her village. Manjubala's story highlights her journey from a housewife to a successful natural farmer and resource person of the project. Before the SUS Farm project's intervention, Manjubala was a typical housewife, managing her household chores and taking care of her family.

Manjubala began her work with the Sus farm project in March 2024. Shortly after, she participated in a 4-day training on nutrition followed by integrated farming, bio-pesticides, vermi-composting, and livestock management in 2024, she also attended a one-time exposure and training session in Kolkata focused on mother and child health. As a community resource person, she actively contributes to malnutrition surveys, haemoglobin assessments, and nutrition awareness sessions.

Today, Manjubala practices natural farming and has made remarkable progress. She successfully grows a variety of crops using organic manure, she has also cultivated varieties of vegetables including radish, peas, local turnips, and long beans, and has also ventured into mushroom cultivation. Notably, she cultivates mushrooms for consumption, a practice that is uncommon in her village. Manjubala's family has been extremely supportive of her new venture and her engagement with the project. Their encouragement has been a crucial factor in her success. Manjubala is planning to cultivate other seasonal vegetables in the next few months, further diversifying her farm produce. Her enthusiasm and dedication to natural farming are an inspiration to her neighbors, whom she encourages to adopt similar practices and consume healthy, chemical-free food. Manjubala's story is a testament to the impact of the SUS Farm project's intervention in empowering rural women and promoting sustainable agriculture practices.

Her journey from a housewife to a successful natural farmer and resource person of the project serves as a model for others to follow, demonstrating the potential for positive change and improved livelihoods through sustainable farming practices.

MITA (Mental Health Intervention and Treatment Alliance)

MITA (Mental Health Intervention and Treatment Alliance) has implemented a comprehensive community-based approach to mental health care, recognizing its critical impact on individuals, families, and communities. This innovative strategy has evolved significantly from its humble beginnings as a monthly camp in Udangshri Dera.

Today, MITA offers a wide array of multifaceted solutions for those grappling with mental health issues while living within their communities. MITA's program is designed with several key objectives in mind. Firstly, it aims to build community capacity, empowering local civil society organisations with the knowledge and skills to support mental health initiatives. Secondly, the program works tirelessly to reduce the pervasive stigma surrounding mental health issues, which often prevents individuals from seeking help. Lastly, MITA facilitates recovery and rehabilitation, providing a supportive environment for those on their journey to improved mental health.

MITA's approach recognizes that mental health care extends beyond clinical settings and must be integrated into the fabric of community life. Their work demonstrates the power of community-based interventions in creating sustainable, culturally sensitive mental health solutions. As MITA continues to grow and evolve, it stands as a model for how mental health care can be reimaged and implemented in diverse communities.

Events and Activities

Community outreach programs on mental

MITA organized various awareness programs on mental health and suicide prevention from July 2024 to January 2025, including events on July 12, 19, 26, and 29, 2024, at different locations like Amteka, Nangalbhangra, Patabari, and Basugaon, as well as December 5, 2024, at Patabari, and January 22, 2025, in Kuklung, engaging approximately 150 participants and covering topics like warning signs of suicide, risk factors, and seeking help

A visit to SUS (Sanatan Unnayan Sangstha), Silchar

A field visit to MITA's partner organization Sanatan Unnayan Sangstha (SUS), Silchar was conducted from 23rd to 25th September 2024. The primary objective was to explore the potential for expanding the MITA program in the Barak Valley and to monitor and strengthen the knowledge and skills of the SUS team. On 23rd September, a meeting was held at Nehru Yuva Kendra, Silchar, involving ED of the ant, Mr. Netaji, Dr. Mintu, and Priyanka, along with representatives from the existing partner and six other organizations from across Barak Valley, to discuss future collaboration opportunities.

The Annual Partners' Meet, 2024

A partner's meeting for knowledge sharing and capacity building has been conducted from 5th Nov to 7th Nov, 2024, at Udangsri Dera, Rowmari, BTR, Assam. No. of participants were 35. The three-day program was facilitated by Dr. Sunil Kaul, Dr. Mintu Moni Sarma, Dr. Nilesh Mohite, Daithun Daimary, Utpal Basumatary, Rufala Brahma and Priyanka Bhuyan.

Story Of Change

A case study on the Systems perspectives: Bulu Shah's story from Baksa

Bulu, a third generation of an immigrant from Bihar, had been the settler in the eastern end of the Bodoland Territorial region for more than 60 years. His grandfather was a labourer, skilled in digging ponds. At that time, in Assam, almost all the village households had a pond either in their front yard or in their backyard. They bought a small piece of land in Suklai, Naokata and were one of the few Bihari families settled there. The area is otherwise predominantly inhabited by the tribal population. His family gradually assimilated into the predominant culture of the area, while retaining their language, culture and traditions intact.

Bulu was suffering from intellectual disability with comorbidities of seizure and psychosis. He was accompanied by his mother to the once-a-month mental health camp conducted by the registered organisation UBSSB has been running the camp for more than 7 years now, with a sizeable footfall of around 200 per month. The nearby civil Hospital is now manned by a sufficient number of doctors, but with an inequitable distribution in various departments. Bulu was taken to two of the biggest private hospitals and the medical college at Guwahati. As per the history of treatment, it was initiated, but in a piecemeal. They had to roam around in four or five different departments with separate queues and, separate payment system. There were repeated visits and huge expenditure per visit for the consultations and the associated procedures. Initially, the fits were not controlled, though the frequency was reduced. They could consult the medical college's superspeciality department, but the queues and repeat visits were almost impossible for them to follow. With only one breadwinner at home and the mother needing to take care of the other household chores, the unfriendliness of the system, they had to discontinue the treatment and started taking treatment from this site. Gradually, his behavioural problems were controlled and seizure was stopped. But the overall specialized care could not be provided with the limitations of the camp as of now.

Conclusion

The Indian health system faces critical challenges in addressing the needs of its marginalized populations, especially for a conventionally lower priority, poorly financed area like mental health. A multifaceted approach, focused on equity, inclusion, and robust governance, is essential to achieving universal health coverage and improving health outcomes for all citizens

Bulu's case typically exemplifies the disparities in health care. The Indian health system is underpinned by a triple structure of utilitarian public care, private care with the objective of financial sustainability, and a very feeble civil society backed non-profit initiative. There are various barriers which affect the determinants negatively. There is an overt fragmentation of service. The excessive focus on specialized services has sidelined integrated services, which are more patient-friendly. There are policies which suffer from perennial inconsistencies in implementation. The accountability mechanism is also weak. The presence of a regulatory authority is not friendly to the targets they serve.

Story Of Change

The Phenomenology of a suicide attempt: Mala's Case

Mala Barman, a 28-year-old female tutor from the suburb of Bongaigaon, was treated for Schizophrenia for more than three years and was in complete remission. She was a witness of the inter ethnic conflicts of 2014 in some pockets of the Bodoland Territorial Region. Many a time she recounted the dreadful scenes she witnessed. Her perceived opinion was that those encounters acted as a trigger for her ailment. Her problem started during her adolescence and was exacerbated before she was treated at Bongaigaon Civil Hospital. A few months later, she shifted to the monthly camps at the ant campus. She was on medication for quite some time, and her compliance was good. She had loving and caring parents and a bunch of supportive relatives. Despite her outward calm and serenity, she battled internal distress, exacerbated at times by financial and personal struggles. But she was symptom-free and had been prescribed only the maintenance dose of an atypical antipsychotic.

Then, just like that, in one monthly camp, she presented with a history of violent suicide attempts three months back. She was visibly disturbed, with the prominent thickened scars at the neck, and a few warty-like keloid formations.

Mala describes the overwhelming grief and guilt she felt in the aftermath. "I kept asking myself—what did I do?" she shared. The stigma surrounding suicide added to her pain, as many neighbours avoided discussions about this. She found solace in the ritualistic spiritual practices she followed. Her relative's response was mixed. While some extended sympathy, others were hesitant to discuss mental health, reinforcing the silence that often surrounds suicide attempt. This hesitation highlighted the need for more awareness programs and open conversations about mental well-being.

We tried to explore the role of support mechanisms in the individual and community through her therapeutic history as a suicidal survivor, who had been subjected to a long-standing sociocultural barrier in an area historically affected by armed violence and civil strife. There has been preexisting inter-ethnic and socio political violence involving the determinants of health in the community where she inhabits. The magnitude of these determinants as a prognosticator for suicidal ideation and commission needs to be given due emphasis. The multi-ethnic communities have innate traditions and characteristics that may influence the individual's personality traits and resilience building. This cannot be established in the linear explanation of the causality of suicidal ideation and causation. An enhanced level of support mechanisms may be associated with the lower odds of suicidality.

Conclusion

Mala's experience underscores the importance of breaking the stigma around suicide, and being more vigilant by the care providers and carers. Mental illness per se enhances the vulnerability of suicide and suicidal ideation. By fostering mental health education and community support, society can create a more compassionate environment for those struggling with suicidal thoughts. Suicide prevention efforts must include accessible mental health resources and encourage open dialogue, ultimately saving lives and strengthening communities.

THIS YEAR CMU HAS MADE 10 VIDEOS AND REACHED 1.46K+ SUBSCRIBERS IN THE YOUTUBE CHANNEL

Community

Media

Unit

In late 2021, the Community Media Unit (CMU) of the ant embarked on a transformative journey. Our vision was simple yet powerful; to harness the power of storytelling through audiovisual media and capture the local issues. What began as an idea has blossomed into a vibrant platform that preserves traditional knowledge, addresses socio-economic challenges, and bridges generational gaps. A vision planning workshop facilitated by Pinky Brahma Choudhury, co-founder of the Media Unit at Samaj Pragati Sahayog (SPS), set the foundation.

VIDEOS PUBLISHED

The short film “Reviving Bodo Traditional Dance and Music” highlights the remarkable efforts of Sifung Harimu Afad, an organization committed to preserving and revitalizing the rich cultural heritage of the Bodo community. Through a comprehensive approach that includes training master trainers, organizing workshops, and fostering a love for traditional arts, Sifung Harimu Afad plays a vital role in ensuring the sustainability of Bodo culture for future generations

Currently, the organization operates four branches—three in Chirang and one in Kokrajhar—dedicated to nurturing Bodo dance and music. Their efforts have sparked a vibrant revival, rekindling interest in traditional practices while empowering a new generation to take pride in their cultural roots. The film showcases the dedication and passion of individuals and communities working tirelessly to keep Bodo traditions alive. As Sifung Harimu Afad continues its inspiring journey, it serves as a beacon of hope for cultural preservation, ensuring that Bodo dance and music remain a vibrant part of the community’s identity for years to come.

3 Short videos of SBI Fellows

During the month of September, the Community Media Unit (CMU) and Communication team at the ant campus conducted interviews with three SBI Fellows, Pragma, Piyu and Rahul. The interviews aimed to capture the reflections of their 13-month journey with the ant and the impact of their work on their communities. The fellows expressed how their experiences transformed their understanding of community issues. The videos were also published in the ant’s media channels.

Ownership in action- Naren Basumatary

CMU has recently published another short video featuring Naren Basumatary, a dedicated staff member of the ant, highlighting his journey and contributions over the years. This video sheds light on his experiences and the impact of his work within the community.

Photography and videography training for youth and staff

The Community Media Unit (CMU) organized mobile photography and videography training for youths in Chirang, equipping them with skills to create impactful visual content. A total of 56 participants attended two initial training sessions in September 2024 and March 2025. Later, 17 selected candidates received advanced training, learning about camera techniques, editing apps, and storytelling. The training also included hands-on exercises, video production, and screening of short films. CMU staff participated in a four-day training session with a professional documentary filmmaker, learning about video editing and DaVinci Resolve software. Selected participants will receive ongoing support from CMU for at least a year.

Apraava Scholarship

the ant initiated the Apraava Scholarship Scheme in the intervention clusters of Chirang District, BTR, Assam. A total of 124 students from economically disadvantaged backgrounds and female-headed households were given the scholarship. The applicants included high school students, secondary school students, and undergraduate students. The scholarship was utilized by the students for their tuition fees, travel allowance, and to buy study materials.
